Directing Engineer for Dam Safety
State of Utah Natural Resources
1636 West North Temple
Salt Lake City, Utah 84116

Gentlemen:

As referenced in a letter to you in September 1984, one of Kennecott's planned emergency facilities to handle the 1984-85 excess storm water from the Bingham Canyon drainage is to raise the embankments of about 100 acres of old evaporation ponds. Attached is the geotechnical evaluation and recommended design of the embankments for your review and approval.

We would appreciate your approval as soon as possible since construction needs to be done before the adverse winter weather conditions occur.

Yours very truly,

S. D. Taylor
Division Environmental Engineer
